Windsor's iCapsol Mini Interim Carpet Cleaner Wins the ISSA 2006 Innovation Award

Denver, Colorado USA – For the second straight year, Windsor Industries was awarded the most innovative product (Power Equipment category) for the Windsor iCapsol Mini™.

This year's ISSA show in Chicago featured the return of the **Innovation Revue**—a full-scale production number (based on a Chicago Speakeasy) showcasing the newest products and technology in the industry. The show included six categories: Chemicals, Power Equipment, Supplies/Accessories, Paper/Plastics, Business Services/Training, and Other Janitorial Products. Exhibitors were excluded from voting; only distributors, building service contractors and in-house service providers were eligible to vote by ballot for the most innovative product in each category.

Windsor's iCapsol Mini won the Power Equipment category against 7 competitors: Advance Adhancer Scrubber¹ (Advance), Focus Ride-on Scrubber with BOOST² (Clarke, a Division of Alto), Cyclone LP 3005³ (Cyclone Environmental Technologies), Razor Blade ride-on scrubber⁴ (Kent), Convert Stand-on scrubber⁵ (Mastercraft/Pristal), Quiet Pro BP back pack vacuum⁶ (ProTeam Inc.), and CleanMax Pro series vacuum⁷ (Tacony Corp).

Quick clean, quick dry, less work.

The iCapsol Mini is an interim carpet care cleaner. This new compact machine uses Windsor's exclusive iCapsol Encapsulation technology, which encapsulates the soil in micro-crystals that are non-sticky and won't attract more soil. The residue is easily vacuumed when the carpet is dry.

This new model allows you to productively clean and freshen up carpet surfaces with less effort. The low-moisture encapsulation process removes spots and spills while improving the overall carpet appearance. Your carpet dries in about 20 with reduced water and chemical consumption. The iCapsol Mini's unique brush system features two counter-rotating brushes that effectively clean and agitate both sides of the carpet nap. It also features a debris bin to capture soil and small debris. The compact, streamlined design allows the operator to clean more effectively in small, congested areas.

In the cleaning industry, where labor accounts for 70 to 90% of floor care operating costs, the greatest benefit comes from those products that increase productivity. With the new iCapsol Mini, Windsor far surpasses the productivity of today's machines.
