FOR IMMEDIATE RELEASE

Castle Rock Introduces New Windsor *Storm* Floor Machines

Denver, Co –Castle Rock Industries today introduced its new Windsor brand of floor machines, *The Storm*. The family of new machines includes low speed (175 rpm) models in widths of 13, 17, 17 and 20 inches, and a dual speed (175/300 rpm) 20 inch model.

The low speed Storm models have a large, 66 frame AC induction motor that provides power to get routine cleaning jobs done faster and better. There are two low speed versions, one with a 1.0 hp motor, and the other with a deluxe 1.50 hp motor.

The dual speed Storm allows operators to employ a 300-rpm speed for polishing and a 175-rpm speed for scrubbing and stripping. The unit features a standard 1.75 hp DC rectified motor that provides extra torque and horsepower for greater productivity. The motor is enclosed to protect against dirt and foreign objects for increased motor life.

Both low speed and dual speed Storm models provide:

- Heavy-duty triple planetary gear-box for smoother operation
- Rugged cast aluminum construction for longer life
- Fully adjustable handle system that provides easy set-up and simple use
- Built-in circuit breaker to protect the motor
- Non-marking wrap around bumper to protect the machine and facility

The Storm floor machines are one member of the Windsor brand of floor care products. Windsor also manufactures the industry's best selling upright vacuums (Versamatic and Sensor), carpet extractors, autoscrubbers, sweepers, burnishers and light industrial equipment.
