FOR IMMEDIATE RELEASE

Windsor Introduces the Radius 300 & 360

Denver, CO – Windsor Industries, a Member of KÄRCHER North America, has designed two new high productivity floor sweepers built to be fast and efficient on hard floors or carpet.

The Radius 300 is a 30-inch, self-propelled battery sweeper with Vacuum Dust Control for improved air quality. The Radius 300 is designed to be durable, but is nimble enough to work in congested areas. Its features include:

- Easy to understand controls, and a main broom and filter accessible without tools
- Manual filter shaker for easy cleaning and consistent performance
- Wet-sweep bypass for cleaning wet surfaces
- Collapsible handle for transportation/storage

The Radius 360 is a highly productive 36-inch ride-on sweeper with dust control. Cleaning surfaces from the roughest industrial flooring to carpet, the Radius 360 is for fast, efficient cleaning. Cleaning large areas is made easy with a large volume debris capacity that is broken up into two easy-to-dump hoppers. Its features include:

- Automatic filter shaker
- Ergonomic adjustable seat, and large heavy-duty rear wheels for comfort
- Large 43 ft² cylindrical filter area for increased filter efficiency
- A polyester filter that can be washed, dried, and re-used

Both sweepers are perfect for parking lots, manufacturing facilities, warehousing or distribution, event centers, and hospitality or education buildings.
