FOR IMMEDIATE RELEASE

Windsor Introduces the Pivot

Denver, CO – Windsor, a Member of KÄRCHER North America, introduces the Pivot - a 16" dual-brush, cylindrical floor scrubber. The versatile, portable Pivot is a compact, versatile scrubber that provides superior scrubbing with two counter-rotating brushes and 60 lbs of down pressure.

The key feature of the Pivot is the compact and portable design that allows user to deep clean in small or congested areas. The Pivot is designed to be used as a walk-behind for precise cleaning, and also as a traditional swing machine for productivity in open areas. This allows the Pivot to perform tasks from daily maintenance to deep cleaning on a wide variety of surface from VCT to grouted tile.

The Pivot is also easy to use and operate. The 2.5 gallon solution tank can easily be removed, and filled at a conventional sink. For transport, two wheels located on the handle can be removed and easily attached to the machine to quickly move the machine from one location to another.

Other features include:

- No-tool brush removal for easy maintenance
- Folding push handle for compact storage
- Solution Tank Fill Port

For more information, or to request a quote on the new Pivot, visit www.windsorind.com.
