

AquaFoil™ Wand

Performance Features

Aluminum wand engineered specifically to keep air stream velocity constant from the vac shoe through the entire wand for increased vacuum performance

Designed for high velocity with no flow loss, drag or in efficiency

Stainless steel manifold evenly distributes air flow and suction across entire width of the vac shoe

2 x .01 Jets

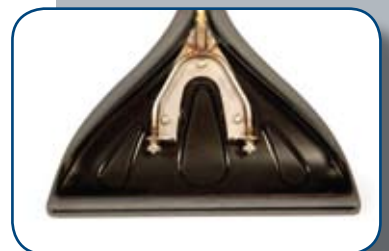

AquaFoil Wand reduces operator fatigue by allowing upright, comfortable operation.

Wand head is designed to provide consistent recovery suction and flow over the entire vacuum shoe.

Low profile allows for cleaning under edges.

Maximum recovery power leaves carpet drier, faster.
